

Resume #1:

Comparing this to the last verified version — the only change is that **the GPA line has been removed** ("GPA: 3.5" is no longer there).

B. Resume Audit Table (updated items only)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Education	"Bachelor of Science in Exercise Science; Minor in Nutrition May 20xx" — no GPA listed	Checklist #5	Unclear	The guideline says GPA should be included <i>if 3.0 or higher</i> . In the last version reviewed, this student's GPA was 3.5 — which would meet that threshold. If this removal was intentional (e.g., the number changed, or the student prefers not to list it), that's fine; but as a guideline matter, a 3.5 GPA is exactly the kind of detail the packet recommends including.	Confirm with student why GPA was removed — if it's still 3.5 or higher, guideline suggests adding it back	Yes

All other sections are unchanged from the last fully-passing review — profile, technical skills, academic projects, experience bullets (tense, verbs, quantification), formatting, and the previously-fixed issues (bullet marker, "report on patient progress") all remain correct.

C. Student-Facing Report (delta from last version)

Hi Josh — one change since the last version: **your GPA (3.5) has been removed** from the Education line.

Since 3.5 is above the Career Center's 3.0 threshold for including GPA, this is worth double-checking:

- If this was intentional (maybe your GPA changed, or you just decided not to include it), that's your call — the guideline doesn't *require* GPA, it only recommends it when it's 3.0+.
- If it was removed by accident while editing, you'll want to add it back: "GPA: 3.5" (or whatever it currently is).

Everything else in the resume is unchanged and still in good shape — bring this specific question to your advisor if you're unsure whether to keep the GPA in.

D. Staff-Facing Report (delta from last version)

Summary of change: GPA line (previously 3.5) has been removed from Education.

AI confidence level: Medium — I can't tell whether this was an intentional choice (e.g., GPA dropped below 3.0, personal preference) or an accidental deletion during editing, since I don't have insight into why the change was made.

Items requiring human verification:

- Confirm current GPA and whether its removal was intentional
- (Carried over from before) LinkedIn URL format, SPSS version, honors/awards status

Possible hallucination or overreach risk: None — flagging is based directly on a documented change between two versions of the same resume.

Suggested discussion point: Ask the student directly why GPA was dropped — if it's still 3.0+, guideline supports re-adding it as a positive detail.

E. Items Requiring Human Verification

1. Reason for GPA removal / current actual GPA
2. Correct, working LinkedIn URL (missing "/in/" segment)
3. Actual SPSS version used
4. Existence of any honors, awards, or Dean's List recognitions

Resume #2:

Comparing this to the last version — the **Profile section** changed significantly: 5 short bullets have been condensed into 3 longer ones, with some new phrasing added.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Profile	"Strong communicator with a client- and patient-centered approach to care, has helped many people in the past before. "	Checklist #3, #9, #20	Needs Revision	This added phrase is vague and unquantified ("many people," "in the past before" is also redundant phrasing — "in the past" and "before" mean the same thing). The guideline wants a short, punchy skills bullet, not a general claim.	Remove the added clause, or replace with something specific if there's a real number/context (e.g., a patient count from an actual role)	No
2	Profile	"...current, and am comfortable using fitness assessment tools, clinical equipment, and wellness tracking software"	Checklist #19	Needs Revision	"am" is a first-person pronoun ("I am"), which the guideline explicitly says to avoid (Tip 8: avoid "I," "we," "my").	Rephrase without the pronoun: "Comfortable using fitness assessment tools, clinical equipment, and wellness tracking"	No

					software" as its own bullet	
3	Profile	Bullets 2 and 3 merged into one long run-on bullet: "Knowledgeable in medical terminology, exercise science, and basic nutrition, CPR/AED Certified..., current, and am comfortable using..."	Checklist #3, #16	Needs Revision	The guideline calls for a short bullet list . This merged bullet crams three distinct ideas (knowledge areas, certification, tech comfort) into one long, comma-heavy sentence, which is harder to scan in the "under 20 seconds" test the guideline references (Tip 5).	Split back into separate bullets, one idea each — as in the previous version
						No

All other sections are unchanged from the prior version — Education (still missing GPA, carried over as unresolved), Technical Skills, Academic Projects, Experience bullets, and formatting all remain as previously reviewed.

C. Student-Facing Report (delta from last version)

Hi Josh — the Profile section changed in this version, and it's worth revisiting.

What to fix

1. Remove "has helped many people in the past before."

This phrase is vague and a little repetitive ("in the past" + "before" say the same thing twice). Career Center guidance wants specific, punchy skill statements — not general claims. If you have something concrete to say (a number, a setting), that would work better; otherwise, this bullet was stronger without it.

2. Drop "am" from the last bullet.

"...and **am** comfortable using fitness assessment tools..." uses "I am" implicitly, which the guidelines specifically ask you to avoid. Simple fix: "Comfortable using fitness assessment tools, clinical equipment, and wellness tracking software."

3. Split the merged bullet back into separate ones.

Your Profile now has one long bullet covering three different things (medical knowledge, CPR certification, and tech comfort) joined by commas. The guideline wants a short, scannable bullet list — a recruiter should be able to read this section in under 20 seconds. Breaking it back into 3 separate bullets (like your earlier version) will read much more cleanly.

Still outstanding from before

- GPA is still missing from Education (was 3.5 in an earlier version) — confirm if that was intentional.
- LinkedIn URL format, SPSS version, and honors/awards are still open questions for your advisor.

Everything else

Experience, Academic Projects, and Technical Skills are unchanged and still solid.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

1. Profile section bullets 2–3 merged into one dense, comma-heavy sentence — conflicts with "short bullet list" (p.1) and the 20-second scannability tip (p.2, Tip 5).
2. First-person pronoun introduced ("am comfortable") — direct conflict with Tip 8.
3. New unquantified, slightly redundant claim added ("has helped many people in the past before") — conflicts with the "quantify whenever possible" spirit of the Experience/Profile sections, and reads as filler rather than a specific qualification.

AI confidence level: High — these are direct, clear guideline conflicts (explicit pronoun rule, explicit "short bullet" requirement).

Items requiring human verification (new): None new — these are style/compliance issues rather than factual ones.

Carried over from before:

- GPA removal (still unresolved)
- LinkedIn URL, SPSS version, honors/awards

Possible hallucination or overreach risk: None — flagged only text actually present in the document, compared directly against prior version and guideline text.

Suggested discussion points:

- Coach student on avoiding first-person pronouns, since this slipped in during editing — good moment to reinforce the "no I/we/my" rule generally, in case it recurs elsewhere in future drafts.
 - Encourage returning to distinct, single-idea bullets in Profile rather than merging for space — if the goal was fitting more onto one page, discuss the margin/font tips (p.2) as a better lever than merging sentences.
-

E. Items Requiring Human Verification

1. Reason for GPA removal (carried over)
2. Correct, working LinkedIn URL (carried over)
3. Actual SPSS version used (carried over)
4. Existence of any honors, awards, or Dean's List (carried over)
5. Whether student intended the Profile section merge, or if it happened accidentally while editing

Resume #3:

Comparing this to prior versions: **GPA is back** (3.5, good), **Profile reverted** to the clean 5-bullet version (good) — but the **Academic Projects** section has been reworded with weaker verbs.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Academic Projects	" Did a review on the connection between gluten sensitivity and neurological disorders"	Checklist #25	Needs Revision	"Did" is not on the approved action verb list and is a weak, generic verb. This was previously "Conducted an in-depth literature review," which used an approved Research Skills verb ("clarified... examined... reviewed..." — this list includes stronger options like "examined," "investigated," "surveyed").	Revert to or use a stronger verb, e.g., "Conducted an in-depth literature review..."	No
2	Academic Projects	" turned findings into a research summary"	Checklist #25	Needs Revision	"Turned" isn't on the approved list. Previously this was "synthesized," which is a stronger, more precise verb for this kind of work.	Consider "synthesize d findings into a research summary"	No

3	Academic Projects	" showed conclusions using APA format and evidence-based analysis tools"	Checklist #25	Needs Revision	"Showed" is vague and not on the approved list. Previously "presented conclusions," which is stronger and appears on the Communication Skills verb list.	Consider "presented conclusions using APA format..."	No
4	Academic Projects	" Worked with a team of four to develop individualized, sport-specific training programs..."	Checklist #25	Needs Revision	"Worked with" is a generic phrase, not an action verb from the approved list. Previously "Partnered with," which is a stronger, more specific choice.	Consider "Partnered with a team of four to develop..."	No
5	Education	"GPA: 3.5"	Checklist #5	Pass	Restored — correctly included since it's 3.0+.	None	No
6	Profile	5 separate bullets, no pronouns, no run-ons	Checklist #3, #16, #19	Pass	Reverted to the clean, compliant version.	None	No

All other sections (Experience bullets, Technical Skills, formatting, contact info) are unchanged from the last fully-reviewed version.

C. Student-Facing Report (delta from last version)

Hi Josh — good news first: your **GPA is back** and your **Profile section** is clean again. Nice work.

One thing slipped in this version — your **Academic Projects** bullets got reworded with weaker verbs:

Now reads	Consider instead
"Did a review on..."	"Conducted an in-depth literature review on..."
"turned findings into a research summary"	"synthesized findings into a research summary"
"showed conclusions using APA format..."	"presented conclusions using APA format..."
"Worked with a team of four..."	"Partnered with a team of four..."

The guideline's action verb list (page 4 of your packet) has plenty of strong options — words like "conducted," "synthesized," "presented," and "partnered" carry more weight than "did," "turned," "showed," and "worked with." Small wording change, but it makes a real difference in how confident and specific this section reads.

Still outstanding from before

- LinkedIn URL format, SPSS version, and honors/awards — still open questions for your advisor.

Everything else

Experience section, Technical Skills, and formatting remain solid and unchanged.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Academic Projects section reworded with four weaker, non-approved-list verbs ("Did," "turned," "showed," "Worked with"), replacing previously stronger choices ("Conducted," "synthesized," "presented," "Partnered"). This is a step backward from the prior compliant version — conflicts with p.4 action verb list guidance.

Positive changes:

- GPA (3.5) restored to Education — resolves the previously flagged unresolved item.
- Profile section reverted to clean, compliant 5-bullet format — resolves the previously flagged pronoun/merge issues.

AI confidence level: High — this is a direct verb-choice comparison against the approved list and the student's own stronger prior phrasing.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — comparison is based directly on text differences across submitted versions.

Suggested discussion points:

- Worth asking the student whether these edits were intentional simplification or accidental — since the verbs moved in the wrong direction relative to guideline goals, this might be a good teaching moment on how word choice affects perceived strength of accomplishments.
 - Confirm which version the student intends as their "final" draft, since several sections have been toggling back and forth (GPA, Profile phrasing) across submissions.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Whether the Academic Projects wording change was intentional or accidental

Resume #4:

Comparing this to the last version: **Academic Projects** reverted to the **strong wording** (good), but the **Experience section (Cardiac/Pulmonary Rehab)** now has a grammar error and has reintroduced mixed tense — worse than previous instances of this issue.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Experience	" Leaded 12 one-hour cardiac and pulmonary exercise classes weekly..."	Checklist #20, #21, #25	Needs Revision	"Leaded" is not a correct English word — the past tense of "lead" is "led." Additionally, since this role is current ("Jan. 20xx – present"), present tense ("Lead") is the better choice anyway, as established in earlier reviewed versions.	Change to "Lead 12 one-hour cardiac and pulmonary exercise classes weekly..."	No

2	Experience	" Administered and review patient health questionnaires prior to each class..."	Checklist #18, #25	Needs Revision	Mixed tense within one sentence: "Administered" (past) + "review" (present). This exact pattern was flagged and fixed in an earlier version.	"Administer and review patient health questionnaires ..."	No
3	Experience	" Checked patient EKGs for ischemic changes and monitor vital signs during classes."	Checklist #18, #25	Needs Revision	Same mixed-tense pattern: "Checked" (past) + "monitor" (present).	"Check patient EKGs for ischemic changes and monitor vital signs during classes."	No
4	Experience	" Wrote exercise prescriptions based on assessment results to address issues."	Checklist #18	Needs Revision	Past tense used for a bullet in an otherwise-current role. Inconsistent with the "present" end date on this position.	"Write exercise prescriptions based on assessment results to address issues."	No
5	Experience	" Taught patients about proper exercise strategies, breathing techniques, and diet/nutrition."	Checklist #18	Needs Revision	Same issue — past tense in a current role.	"Teach patients about proper exercise strategies, breathing techniques, and diet/nutrition."	No

6	Experience	" Monitored patient adherence to protocols and report on patient progress."	Checklist #18, #25	Needs Revision	Mixed tense again: "Monitored" (past) + "report" (present).	"Monitor patient adherence to protocols and report on patient progress."	No
7	Academic Projects	"Conducted an in-depth literature review...synthesized findings...presented conclusions..." / "Partnered with a team of four..."	Checklist #25	Pass	Reverted to strong verb choices, resolving the issue flagged in the previous version.	None	No

All other sections (Profile, GPA, Technical Skills, formatting, Sales Associate/Lifeguard bullets) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — your Academic Projects section is back to strong wording, nice work there.

But the **entire Cardiac and Pulmonary Rehab section** now needs attention — this is your current role ("Jan. 20xx – present"), so every bullet should stay in **present tense**. Right now it's a mix, and one word isn't even correct English:

Now reads	Fix
" Leaded 12 one-hour cardiac..."	" Lead 12 one-hour cardiac..." ("Leaded" isn't a real word — and present tense fits better here anyway)
" Administered and review..."	" Administer and review..."
" Checked patient EKGs... and monitor..."	" Check patient EKGs... and monitor..."
" Wrote exercise prescriptions..."	" Write exercise prescriptions..."

"Taught patients about..."

"Teach patients about..."

"Monitored patient
adherence... and report..."

"Monitor patient adherence... and report..."

This is the same present-tense pattern you nailed in an earlier draft — this version just needs those six bullets switched back. Since you're still in this role, present tense throughout is the right call.

Still outstanding from before

- LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.
-

D. Staff-Facing Report (delta from last version)

Summary of new issues:

The entire Cardiac/Pulmonary Rehab bullet set (6 bullets) has reverted from present tense to a mix of past tense and mixed-tense-within-sentence, plus one non-word ("Leaded"). This is a regression relative to a previously reviewed compliant version, and is the most significant tense-consistency issue seen across this student's submitted drafts so far.

Positive: Academic Projects verbs reverted to the stronger phrasing, resolving the prior draft's issue.

AI confidence level: High — tense inconsistency and the "leaded" non-word are unambiguous, directly checkable issues.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — findings are based directly on comparing this draft's text against the guideline and the student's own previously-reviewed compliant version.

Suggested discussion points:

- This is the third time tense consistency has fluctuated across drafts (fixed → regressed → fixed → regressed again). Worth discussing directly with the student how they're

editing (e.g., is a tool or template reintroducing this pattern?), since this seems to be an unstable point across revisions rather than a one-off slip.

- Reinforce: since the internship is ongoing, present tense throughout is correct and should be the "locked in" choice going forward.

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Whether the recurring tense regression in the Cardiac/Pulmonary Rehab section reflects the student's actual editing process or a version-tracking mix-up on their end

Resume #5:

Comparing this to the last version: the **Cardiac/Pulmonary Rehab** section is now correctly **present tense throughout** (great — this finally landed). But tense errors have popped up in three other places: **Academic Projects**, **Sales Associate**, and **Lifeguard**.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Experience	Cardiac/Pulmonary Rehab: "Lead... Administer and review... Check... and monitor... Write... Teach... Monitor... and report..."	Checklist #18, #25	Pass	Fully present tense and internally consistent — correctly matches this role's "present" end date. This resolves the recurring issue from the last several drafts.	None	No
2	Academic Projects	" Conduct an in-depth literature review... synthesized findings... presented conclusions..."	Checklist #18	Needs Revision	Mixed tense within one sentence: "Conduct" (present) + "synthesized"/"presented" (past). This project is dated Spring 20xx — a completed academic term — so it should be past tense throughout.	" Conducted an in-depth literature review... synthesized... presented..."	No
3	Academic Projects	" Partner with a team of four to develop... used fitness assessments..."	Checklist #18	Needs Revision	Same issue: "Partner" (present) + "used" (past) in one sentence, for a Spring 20xx	" Partnered with a team of four to develop... used fitness"	No

				(completed) project.	assessments.. ."		
4	Experience	Sales Associate (May 20xx – Dec. 20xx , a past/completed role): "Advise customers... Match product recommendations... Research the benefits..."	Checklist #18	Needs Revision	This role has an end date, meaning it's over — all three bullets should be past tense, but they're now present tense.	"Advised customers... Matched product recommendations... Researched the benefits..."	No
5	Experience	Lifeguard (Summers 20xx, a past/completed role): "Ensure safety of children... and always enforced facility rules and policies."	Checklist #18	Needs Revision	Mixed tense in one sentence: "Ensure" (present) + "enforced" (past), for a role that ended.	"Ensured safety of children... and always enforced facility rules and policies."	No
6	Experience	Lifeguard: "Respond quickly to emergencies and maintained a calm, professional presence under pressure."	Checklist #18	Needs Revision	Same mixed-tense pattern: "Respond" (present) + "maintained" (past).	"Responded quickly to emergencies and maintained a calm, professional presence under pressure."	No

All other sections (Profile, GPA, Technical Skills, formatting, contact info) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — good progress: your **current role (Cardiac and Pulmonary Rehab)** is now fully and correctly in present tense. That one's settled.

But tense slipped in three other spots that are actually the opposite problem — these are **completed** roles/projects (they have end dates), so they need **past tense** throughout, and right now they're mixed with present tense:

Academic Projects (both dated Spring 20xx — finished):

- "Conduct an in-depth literature review... synthesized... presented..." → should be **"Conducted..."**
- "Partner with a team of four... used..." → should be **"Partnered..."**

Sales Associate (ended Dec. 20xx):

- "Advise customers... Match product recommendations... Research the benefits..." → should be **"Advised... Matched... Researched..."**

Lifeguard (Summers 20xx — finished):

- "Ensure safety... and always enforced..." → should be **"Ensured** safety... and always enforced..."
- "Respond quickly to emergencies and maintained..." → should be **"Responded** quickly to emergencies and maintained..."

Quick rule of thumb: if the role/project has an end date, use past tense for every bullet in it. If it says "present" (like your Cardiac/Pulmonary Rehab role), use present tense throughout. Right now your current role has this right — it's the finished ones that need the switch back.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Tense consistency issue has now spread to Academic Projects, Sales Associate, and Lifeguard sections — all completed items that should be past tense but now mix in present tense. This is the inverse of the previous draft's problem (where the *current* role incorrectly used past tense).

The current role itself is now correctly present-tense throughout, resolving that specific recurring issue.

AI confidence level: High — tense/date consistency is directly verifiable against each section's own listed date range.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — findings are based on direct comparison of each section's stated dates against its verb tense.

Suggested discussion points:

- Tense consistency has now flipped problems across four consecutive drafts (past↔present, in different sections each time). This may be worth a focused explanation with the student: past tense for completed roles/dated projects, present tense only for the one role marked "present." A simple rule stated explicitly may help this stick across the rest of their application materials, not just this resume.
 - Otherwise, resume is close to final — action verbs, formatting, and quantification are solid across the board once tense is locked in consistently.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Whether the student understands the past/present tense rule tied to role end dates (recommend advisor walk through this explicitly, given the pattern across drafts)

Resume #6:

Comparing this to the last version — one full fix (Academic Projects bullet 1), but now the errors have shifted into **mixed tense within individual sentences**, scattered across several sections rather than being wrong for a whole section.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Academic Projects	"Conducted an in-depth literature review... synthesized... presented..."	Checklist #18	Pass	Fixed — fully past tense now, consistent with this being a Spring 20xx (completed) project.	None	No
2	Academic Projects	" Partner with a team of four to develop... used fitness assessments..."	Checklist #18	Needs Revision	Still mixed: "Partner" (present) + "used" (past), for a completed Spring 20xx project.	" Partnered with a team of four to develop... used fitness assessments..."	No
3	Experience	Cardiac/Pulmonary Rehab: " Checked patient EKGs for ischemic changes and monitor vital signs during classes."	Checklist #18	Needs Revision	Mixed tense within one sentence: "Checked" (past) + "monitor" (present). This role is current ("present"), so should be all	" Check patient EKGs for ischemic changes and monitor vital signs during classes."	No

					present tense.		
4	Experience	Cardiac/Pulmonary Rehab: "Monitored patient adherence to protocols and report on patient progress."	Checklist #18	Needs Revision	Same pattern: "Monitored" (past) + "report" (present) in one sentence.	"Monitor patient adherence to protocols and report on patient progress."	No
5	Experience	Cardiac/Pulmonary Rehab: "Lead... Administer and review... Write... Teach..."	Checklist #18	Pass	These four bullets are correctly present tense.	None	No
6	Experience	Sales Associate (ended Dec. 20xx): "Advised customers... Match product recommendations... Researched the benefits..."	Checklist #18	Needs Revision	"Match" is present tense, but this role has ended — it should match the past tense used in the surrounding bullets ("Advised," "Researched").	"Matched product recommendations to individual needs..."	No
7	Experience	Lifeguard (Summers 20xx, completed): "Ensured safety of children... and always enforced facility rules and policies."	Checklist #18	Pass	Correct — fully past tense, consistent with a completed role.	None	No

8	Experience	Lifeguard: "Respond quickly to emergencies and maintained a calm, professional presence under pressure."	Checklist #18	Needs Revision	Mixed tense within one sentence: "Respond" (present) + "maintained" (past), for a role that's already over.	" Responded quickly to emergencies and maintained a calm, professional presence under pressure."	No
---	------------	--	---------------	----------------	---	---	----

All other sections (Profile, GPA, Technical Skills, formatting, contact info) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — you fixed one of the four issues from last time (the first Academic Projects bullet is now correctly past tense). But the tense issue hasn't fully resolved — it's now showing up as **mixed tense within single sentences**, in four spots:

Where	Now reads	Fix
Academic Projects (2nd bullet)	" Partner with a team of four... used fitness assessments..."	" Partnered with a team of four... used fitness assessments..."
Cardiac/Pulmonary Rehab	" Checked patient EKGs... and monitor vital signs..."	" Check patient EKGs... and monitor vital signs..."
Cardiac/Pulmonary Rehab	" Monitored patient adherence... and report on patient progress."	" Monitor patient adherence... and report on patient progress."
Sales Associate	"Advised customers... Match product recommendations... Researched..."	"Advised customers... Matched product recommendations... Researched..."
Lifeguard	" Respond quickly to emergencies and maintained a calm presence..."	" Responded quickly to emergencies and maintained a calm presence..."

The core rule stays the same: your Cardiac/Pulmonary Rehab role is current, so it's all present tense. Everything else (Academic Projects, Sales Associate, Lifeguard) is finished, so

it's all past tense. Right now, a few individual sentences have one tense at the start and the other tense at the end — worth reading each bullet out loud, start to finish, to catch that.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Tense consistency issue persists but has changed shape — from whole-section tense mismatches (previous drafts) to intra-sentence tense mixing (this draft), spread across Academic Projects, current-role Experience bullets, Sales Associate, and Lifeguard. One bullet (Academic Projects #1) was successfully corrected.

AI confidence level: High — each instance is a clear, directly-checkable mismatch between a sentence's two verbs.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — findings are based on direct grammatical comparison within each cited sentence.

Suggested discussion points:

- This is the fifth consecutive draft with a tense-related issue, though the *type* of error keeps shifting (wrong-section tense → now mid-sentence tense splits). Recommend the advisor do a live line-by-line tense check together with the student rather than pointing out individual instances again, since isolated fixes don't seem to be resolving the underlying pattern.
 - Otherwise the resume is essentially finalized — action verbs, quantification, and formatting have been solid for several drafts running.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Recommend a live, line-by-line tense review with the student during the advising appointment, given the recurring pattern across six consecutive drafts

Resume #7:

Comparing this to the last version — **all tense issues are now resolved** (great, finally consistent throughout). But this draft introduces a wave of typos across several sections.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Experience	Cardiac/Pulmonary Rehab bullets — tense now fully consistent (present throughout)	Checklist #18	Pass	All six bullets in this current role are now correctly present tense with no intra-sentence mixing. Resolves the issue from the last several drafts.	None	No
2	Experience	Sales Associate, Lifeguard — tense now fully consistent (past throughout)	Checklist #18	Pass	Both completed roles are now correctly past tense throughout.	None	No
3	Academic Projects	" sthesized findings ino a research summary nd presented conclusion using APA format..."	Checklist #21	Needs Revision	Multiple typos in one sentence: "sthesized" → "synthesized"; "ino" → "into"; "nd" → "and"; "conclusion" is likely	"...synthesized findings into a research summary and presented conclusions using APA format..."	No

missing the
"s"
("conclusions
").

4	Academic Projects	"...to tailor strength, edurance , and flexibility plans..."	Checklist #21	Needs Revision	Typo: "edurance" → "endurance"	"...strength, endurance, and flexibility plans..."	No
5	Experience	"Administer and review patient health questionnaires prior to each class..."	Checklist #21	Needs Revision	Typo: "questionnaire s" → "questionnaires"	"...patient health questionnaire s..."	No
6	Experience	"Check pent EKGs for ischemic changes and monitor vital signs during classes."	Checklist #21	Needs Revision	Typo: "pent" → "patient"	"Check patient EKGs for ischemic changes..."	No
7	Experience	"Write exercise prescriptions bsed on assessment results to address issues."	Checklist #21	Needs Revision	Typo: "bsed" → "based"	"...prescriptions based on assessment results..."	No
8	Experience	"Teach patients about proper exercise strategies, beathing techniques, and diet/nutrition."	Checklist #21	Needs Revision	Typo: "beathing" → "breathing"	"...breathing techniques, and diet/nutrition."	No

9	Experience	"Researched the benefits of produc to support customer education..."	Checklist #21	Needs Revision	Typo: "produc" → "products"	"...benefits of products to support customer education..."	No
10	Experience	"Responded quick to emergencs and maintained a calm, professional presence..."	Checklist #21	Needs Revision	Two typos: "quick" should be the adverb "quickly"; "emergencs" → "emergencies"	"Responded quickly to emergencies and maintained a calm, professional presence..."	No

All other sections (Profile, GPA, Technical Skills, formatting, contact info) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — great news: **tense is now fully consistent** across the whole resume. That issue is resolved.

This version has a different problem, though: **several typos scattered through Academic Projects and Experience**. Here's the full list to fix:

Section	Typo	Fix
Academic Projects	"sthesized," "ino," "nd," "conclusion"	"synthesized," "into," "and," "conclusions"
Academic Projects	"edurance"	"endurance"
Experience	"quesionnaires"	"questionnaires"
Experience	"pent EKGs"	"patient EKGs"
Experience	"bsed"	"based"
Experience	"beathing"	"breathing"

Experience	"produc"	"products"
Experience	"quick," "emergencs"	"quickly," "emergencies"

This is exactly the kind of thing the Career Center guideline warns about (Tip 10: "No typos! ... Using Spell Check on your computer is NOT enough!"). A good next step: run spell check, then read the whole thing out loud slowly — that combination tends to catch things spell check misses (like "pent" instead of "patient," which is a real word so spell check won't flag it).

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Eight typos introduced across Academic Projects and Experience sections — several are real-word substitutions (e.g., "pent" for "patient," "produc" for "products") that spell check alone would likely miss, directly illustrating the guideline's Tip 10 warning.

Resolved: All tense-consistency issues flagged across the previous several drafts are now fully corrected — present tense throughout the current role, past tense throughout completed roles/projects, no intra-sentence mixing.

AI confidence level: High — typos are unambiguous and directly verifiable against standard English spelling.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — all flagged items are literal misspellings present in the submitted text.

Suggested discussion points:

- Good moment to reinforce Tip 10 directly: spell check won't catch real-word typos ("pent," "produc," "nd"), so a read-aloud pass is worth recommending as a standing habit for this student's future drafts.

- Tense consistency is now fully resolved — worth confirming with the student that they understand the underlying rule (present tense for current role, past tense for completed items) so it holds in the final version.
 - Resume is very close to final; typo cleanup is the main remaining item.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Confirm the student has a final, cleanly-proofread version ready before the appointment (typos, not compliance issues, are now the primary open item)

Resume #8:

Comparing this to the last version — all the spelling typos from before are fixed, but three commas have gone missing, creating run-together phrases in a few spots.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Academic Projects	"...synthesize d findings into a research summary and presented conclusions using APA format..."	Checklist #21	Pass	All prior typos ("sthesized," "ino," "nd," "conclusion") are fixed.	None	No
2	Academic Projects	"...to tailor strength endurance , and flexibility plans based on developmenta l needs."	Checklist #21	Needs Revision	Missing comma between "strength" and "endurance" — this is a list of three items ("strength, endurance, and flexibility"), and without the comma it briefly reads as one compound term ("strength endurance").	"...to tailor strength, endurance, and flexibility plans..."	No

3	Experience	"Lead 12 one-hour cardiac and pulmonary exercise classes weekly each with 3-8 patients. "	Checklist #21	Needs Revision	Missing comma before "each" — without it, "weekly each" reads awkwardly as if run together, rather than clearly separating the frequency ("weekly") from the class size detail ("each with 3-8 patients").	"...exercise classes weekly, each with 3-8 patients."	No
4	Experience	"Administer and review patient health questionnaire s prior to each class making any needed adjustments."	Checklist #21	Needs Revision	Missing comma before "making" — this creates a run-on feel between the main action and the follow-up clause.	"...prior to each class, making any needed adjustments."	No
5	Experience	"Responded quickly to emergencies and maintained a calm professional presence under pressure."	Checklist #21	Needs Revision	Missing comma between "calm" and "professional" — both are separate descriptive adjectives modifying "presence" (a calm presence, a professional presence), so a comma is	"...maintained a calm, professional presence under pressure."	No

needed
between them.

All other sections (Profile, GPA, Technical Skills, Sales Associate bullets, Lifeguard's first bullet, formatting, contact info) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — nice work, all the spelling typos from last time are fixed. This version has a smaller, different issue: a few **missing commas** that make some sentences run together:

Now reads	Fix
"...tailor strength endurance, and flexibility plans..."	"...tailor strength, endurance, and flexibility plans..."
"...exercise classes weekly each with 3-8 patients."	"...exercise classes weekly, each with 3-8 patients."
"...prior to each class making any needed adjustments."	"...prior to each class, making any needed adjustments."
"...maintained a calm professional presence under pressure."	"...maintained a calm, professional presence under pressure."

These are small, but the guideline's "No typos!" tip (Tip 10) covers this kind of thing too — missing punctuation can make a sentence briefly confusing on a quick read, which works against the "scannable in 20 seconds" goal (Tip 5).

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Four missing commas introduced, creating run-on or ambiguous phrasing in Academic Projects and two Experience bullets (Cardiac/Pulmonary Rehab, Lifeguard). All are minor punctuation gaps, not content or compliance issues.

Resolved: All eight spelling typos from the previous draft are corrected.

AI confidence level: High — comma placement here is a standard grammar convention (Oxford comma in lists, comma before a trailing participial phrase, comma between coordinate adjectives), directly checkable.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — all flagged items are grammatical/punctuation observations grounded in standard English usage, not fabricated content.

Suggested discussion points:

- This resume is essentially proofread-final aside from these small punctuation fixes — a good candidate to wrap up quickly at the appointment.
- Worth noting for the student: a careful read-aloud pass tends to catch missing commas as naturally as it catches misspellings, since run-on phrasing sounds off when spoken.

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List

Resume #9:

Comparing this to the last version — all the previous comma issues are fixed, but the **bullet points have been removed entirely from Academic Projects and Experience** (only the Profile section still has bullets).

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Academic Projects	"...to tailor strength, endurance, and flexibility plans..."	Checklist #21	Pass	Missing comma from last version is fixed.	None	No
2	Experience	"...classes weekly, each with 3-8 patients." / "...class, making any needed adjustments." / "...a calm, professional presence..."	Checklist #21	Pass	All three missing commas from last version are fixed.	None	No

3	Academic Projects	Both project entries now run as plain paragraphs with no bullet markers	Checklist #16	Needs Revision	The guideline calls for bullet descriptions in Experience specifically (p.1), and more broadly recommends bullet points for readability: "Using bullet points can make a resume easier to read (it draws the reader's eyes down the page)" (p.3 annotation). Without bullets, each project reads as a dense paragraph, which works against the "scannable in under 20 seconds" goal (Tip 5).	Restore "•" bullet markers before each project's description, as in earlier versions	No
---	-------------------	---	---------------	----------------	--	--	----

4	Experience	All six Cardiac/Pulmonary Rehab lines, all three Sales Associate lines, and both Lifeguard lines now run as plain paragraph text with no bullet markers	Checklist #8, #16	Needs Revision	The guideline explicitly specifies "bullet descriptions of your key job responsibilities and accomplishments" for Experience (p.1). Removing bullets here is a more direct guideline conflict than the Academic Projects case, since Experience formatting is spelled out as a requirement rather than just a general tip.	Restore "•" bullet markers before each Experience line	No
5	Overall	Profile section retains its 5 bullet points	Checklist #3	Pass	Bullet formatting here is unaffected and still compliant.	None	No

C. Student-Facing Report (delta from last version)

Hi Josh — nice work, all four comma issues from last time are fixed.

This version has a new, more visible issue: **the bullet points are gone from your Academic Projects and Experience sections**. Only your Profile section still has bullets. Right now, both projects and all three jobs read as solid blocks of paragraph text instead of the bulleted format you had before.

This matters because the guideline specifically calls for bullet descriptions in your Experience section, and more generally notes that bullets help a reader's eyes move down the page quickly

— recruiters often scan a resume in under 20 seconds, and dense paragraphs are much harder to skim than clean bullet points.

Fix: Add the "•" bullet marker back in front of each project description and each job responsibility line, the way your Profile section already has it.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Bullet formatting removed entirely from Academic Projects and Experience sections (11 lines total) — direct conflict with the guideline's explicit "bullet descriptions" requirement for Experience (p.1) and general readability guidance (p.3 annotation, Tip 5). Profile section bullets remain intact.

Resolved: All four comma/punctuation issues from the previous draft are fixed.

AI confidence level: High — bullet presence/absence is directly observable in the text, and the guideline's requirement for bulleted Experience descriptions is explicit.

Items requiring human verification:

- Whether the missing bullets are a formatting/export artifact (e.g., PDF conversion stripped bullet characters) or an intentional stylistic change on the student's part — recommend a quick visual check of the student's actual working document

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — the absence of bullet markers is a direct textual observation, not an inference.

Suggested discussion points:

- Confirm with the student whether this was an intentional stylistic experiment or an accidental loss of formatting (e.g., from copy-pasting between programs) — worth asking directly given how much this changes the resume's scannability.

- If intentional, walk through why the guideline favors bullets specifically for Experience, since it's not just a stylistic preference but the explicit expected format on p.1.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Confirm whether the missing bullets in Academic Projects/Experience are an intentional change or a formatting/export error

Resume #10:

Comparing this to the last version — bullets are restored throughout (good), but this version has **removed all dates**: the graduation date from Education, and every employment date range from Experience.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Academic Projects	Bullets restored ("• Research Methods in Exercise Physiology:" / "• Exercise Physiology II:")	Checklist #16	Pass	Resolves the previous draft's missing-bullet issue.	None	No
2	Experience	Bullets restored on all job responsibility lines	Checklist #8, #16	Pass	Resolves the previous draft's missing-bullet issue.	None	No
3	Education	"Bachelor of Science in Exercise Science; Minor in Nutrition; GPA: 3.5" — no graduation date listed	Checklist #4	Needs Revision	The guideline explicitly requires "month and year of graduation (or expected graduation)" in Education. This was present in every prior version ("May 20xx") and is now missing entirely.	Add back the graduation month/year, e.g., "May 20xx"	No

4	Academic Projects	"Research Methods in Exercise Physiology:" and "Exercise Physiology II:" — no semester/year listed	Checklist #6 (implicit — dates support "relevant" context)	Needs Revision	Both projects previously included "(Spring 20xx)." While the guideline's Academic Projects guidance doesn't explicitly require a date, removing it takes away useful context (how recent the project was), and is inconsistent with the dated format used everywhere else on the resume.	Add back "(Spring 20xx)" after each project title	No
---	-------------------	---	--	----------------	--	---	----

5	Experience	"Exercise Physiology Intern" — no employment dates listed	Checklist #8	Needs Revision	The guideline requires "employment dates (month and year)" for each experience entry. This was "Jan. 20xx – present" in every prior version and is now missing. Without it, a reader can't tell if this role is current or how long the student has held it — this is also the role that determines correct verb tense (present vs. past), so removing the date removes important context.	Add back "Jan. 20xx – present"	No
6	Experience	"Sales Associate" — no employment dates listed	Checklist #8	Needs Revision	Same issue — dates ("May 20xx – Dec. 20xx") were present before and are now missing.	Add back "May 20xx – Dec. 20xx"	No
7	Experience	"Lifeguard" — no employment dates listed	Checklist #8	Needs Revision	Same issue — dates ("Summers 20xx and 20xx") were present before and are now missing.	Add back "Summers 20xx and 20xx"	No

All other sections (Profile, GPA value, Technical Skills, tense, punctuation, contact info) are unchanged and remain compliant.

C. Student-Facing Report (delta from last version)

Hi Josh — your bullet points are back across Academic Projects and Experience. That issue's resolved.

This version has a new issue, though: **every date on the resume has been removed**. Specifically:

- Your graduation date is gone from Education
- Your dates for Academic Projects (previously "Spring 20xx") are gone
- All three of your job date ranges are gone (Exercise Physiology Intern, Sales Associate, Lifeguard)

The Career Center guideline is specific about this: Education should include your graduation month/year, and each Experience entry should include employment dates (month and year). This isn't just a formatting nicety — without dates, a recruiter can't tell how recent your experience is, or whether a role is current versus finished (which also affects whether your bullets should be in past or present tense, something you've been fine-tuning in earlier drafts).

Fix: Add all the dates back in — your expected graduation date, the semester/year for each project, and the month/year ranges for each job.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

All date information has been stripped from the resume: graduation date (Education), project semesters (Academic Projects), and employment date ranges (all three Experience entries). This is a direct conflict with explicit guideline requirements for both Education ("month and year of graduation") and Experience ("employment dates (month and year)") on p.1.

Resolved: Bullet formatting restored throughout Academic Projects and Experience, resolving the previous draft's issue.

AI confidence level: High — date presence/absence is directly observable, and the guideline explicitly requires dates in both Education and Experience.

Items requiring human verification:

- Whether date removal was intentional (e.g., student experimenting with a different format) or an accidental deletion during editing — worth asking directly, since this is a significant compliance regression and also removes information staff would need to advise on tense/verb consistency in Experience.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — this is a direct comparison of what's present versus absent relative to explicit, page-1 guideline requirements.

Suggested discussion points:

- This is a notable regression on a hard guideline requirement (not just a style tip) — recommend flagging this clearly and early in the appointment.
- Worth asking the student why dates were removed — if this was intentional (e.g., concern about age-related bias), that's a legitimate conversation to have, but the current guideline still requires dates, so the advisor may want to discuss alternatives (e.g., "Anticipated May 20xx" format used elsewhere in the packet) rather than omitting them entirely.

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Reason for removing all dates from Education, Academic Projects, and Experience — confirm whether intentional and discuss guideline requirement directly with student

Resume #11:

All the text content matches the earlier fully-compliant version — dates are back, bullets are back, tense and punctuation are all correct. The filename suggests a formatting change (bolding), which isn't something I can see from the text alone, so let me check the actual file.

Ran 4 commands, viewed 2 files

Ran 4 commands, viewed 2 files

Confirmed visually and at the font level: this version has **removed bolding** from the name, section headers, and job/organization titles. Everything now renders in the same plain (non-bold) Calibri weight.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Header	"Josh DeGregorio" — no longer bold	Checklist #24 (implicit — name emphasis)	Needs Revision	The sample resume in the guideline packet (p.3) shows the student's name in bold, larger text as the visual anchor of the page ("Name should be the largest text on the page" — the model shows it bolded too). Here,	Re-bold the name at the top	Yes (visual confirmation)

the name is now the same weight as everything else, so it no longer stands out.

2	Section Headers	"PROFILE," "EDUCATION," "TECHNICAL SKILLS," "ACADEMIC PROJECTS," "EXPERIENCE" — no longer bold	Checklist #16, #18	Needs Revision	Section headers are unbolded, which reduces the visual organization the guideline calls for ("logically organized, visually appealing" — Tip 5) and makes it harder to quickly scan which section is which.	Re-bold all major section headers	Yes
---	-----------------	--	--------------------	----------------	---	-----------------------------------	-----

3	Experience	Job titles ("Exercise Physiology Intern," "Sales Associate," "Lifeguard") and organization names — no longer bold	Checklist #18	Needs Revision	These were previously bolded to stand out from the descriptive bullets beneath them; without bold, job titles blend visually with the surrounding text, making it harder to scan reverse-chronological job history quickly.	Re-bold job titles (and/or organization names) as in earlier versions	Yes
---	------------	---	---------------	----------------	---	---	-----

4	Overall	Only one font weight (regular) used throughout the entire document	Checklist #18	Needs Revision	The guideline calls for consistent, purposeful formatting. A single font weight for both headers and body text isn't a "typo," but it removes a layer of visual hierarchy that helps a reader scan the document in under 20 seconds (Tip 5).	Reintroduce bold for name/headers/titles per standard practice	No
---	---------	--	---------------	----------------	--	--	----

All content (text, dates, tense, punctuation, bullets) is otherwise identical to the fully-compliant version and remains correct.

C. Student-Facing Report (delta from last version)

Hi Josh — the wording and content here are all still solid (dates, bullets, tense, punctuation are all correctly in place).

The change this time is visual: **your name, section headers, and job titles are no longer bold**. Everything on the page is now the same font weight. This isn't a content problem, but it does make the resume harder to scan quickly — a recruiter skimming your resume relies on bold section headers ("EDUCATION," "EXPERIENCE") and bold job titles to quickly orient themselves.

Fix: Re-bold:

- Your name at the top
- Each section header (PROFILE, EDUCATION, TECHNICAL SKILLS, ACADEMIC PROJECTS, EXPERIENCE)
- Your job titles (Exercise Physiology Intern, Sales Associate, Lifeguard)

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

All bolding has been stripped from the document — name, section headers, and job titles are now the same weight as body text. Confirmed both at the font level (Calibri-Bold exists in the file's embedded fonts but is only applied to two blank space characters) and via visual rendering of the page.

Resolved: No content regressions — all text, dates, tense, and punctuation remain correct from the prior fully-compliant draft.

AI confidence level: High. This was verified directly against the PDF's embedded font data and a rendered image of the page, not inferred from text extraction alone.

Items requiring human verification:

- Confirm with student whether bold removal was intentional (e.g., a different formatting experiment) or accidental (e.g., "select all, clear formatting" during an edit)

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — this finding is grounded in direct visual/font inspection of the actual file, the most concrete verification method used across this whole review series.

Suggested discussion points:

- Good chance to reinforce the visual hierarchy principle from Tip 5 (scannable in under 20 seconds) — bold isn't just decorative, it's what lets a reader's eye jump straight to job titles and section headers.

- This resume has now cycled through nearly every individual formatting element (bullets, dates, tense, punctuation, bolding) across 11 drafts — recommend the advisor do one final, full side-by-side check against a clean, fully-compliant reference version before sign-off.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Whether bold removal was intentional or accidental
5. Recommend a final full-document check against the last fully-compliant version, given how many individual formatting elements have shifted across this draft series

Resume #12:

All the text content matches the earlier fully-compliant version — dates are back, bullets are back, tense and punctuation are all correct. The filename suggests a formatting change (bolding), which isn't something I can see from the text alone, so let me check the actual file.

Ran 4 commands, viewed 2 files

Ran 4 commands, viewed 2 files

Confirmed visually and at the font level: this version has **removed bolding** from the name, section headers, and job/organization titles. Everything now renders in the same plain (non-bold) Calibri weight.

5. Recommend a final full-document check against the last fully-compliant version, given how many individual formatting elements have shifted across this draft series

Resume #13:

The text content matches the fully-compliant version exactly. Given the filename ("inconsistent_style"), let me check the actual visual formatting, since style issues like mixed fonts often aren't visible in plain text.

Deciphered font data despite incomplete image information

Deciphered font data despite incomplete image information

Now I have precise, verified formatting data. This version has clear, specific style inconsistencies.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Education	"Bachelor of Science in Exercise Science; Minor in Nutrition; GPA: 3.5" now rendered in bold	Checklist #18	Needs Revision	This degree line was plain text in the fully-compliant version and is now bolded — but nothing else in Education (like the university name below it) is bolded, so it doesn't match the visual pattern used elsewhere in the resume (bold reserved for name/headers/job titles).	Remove bold from the degree line to match the rest of Education	Yes

2	Technical Skills	"Maximal and submaximal VO2 tests, Bruce/Modified Bruce Protocol Stress Test..." now rendered in <i>italics</i>	Checklist #18	Needs Revision	The entire "Testing:" skill list is now italicized, while the parallel "Software:" list right below it is not. Italics aren't used anywhere else on the resume, so this creates an inconsistent, one-off style choice.	Remove italics so both skill lists match	Yes
3	Academic Projects	" Research Methods in Exercise Physiology " and " Exercise Physiology II " now rendered in bold, mid-sentence	Checklist #18	Needs Revision	Project titles are now bold <i>within</i> the same sentence as the (non-bold) date and description, creating a visual style not used elsewhere for project entries in prior compliant versions.	Remove bold, or apply it consistently if this is meant to mirror how job titles are bolded in Experience	No

4	Experience	Five bullets under "Exercise Physiology Intern" ("Administer and review...", "Check patient EKGs...", "Write exercise prescriptions..", "Teach patients...", "Monitor patient adherence...") now rendered in <i>italics</i>	Checklist #18	Needs Revision	These bullets are italicized while the first bullet in the same job ("Lead 12 one-hour cardiac...") and all bullets in every other job (Sales Associate, Lifeguard) are not. This is the most visually jarring inconsistency — one job's bullets look different from the rest with no apparent reason.	Remove italics so all Experience bullets match in style	Yes
5	Experience	Last Lifeguard bullet ("Responded quickly to emergencies..") is 12pt font, while every other bullet on the page is 11pt or 11.5pt	Checklist #18, #24	Needs Revision	This single bullet is a slightly larger font size than the rest of the document, which is inconsistent and may also affect page length if repeated.	Set to match surrounding font size (11pt)	Yes

6	Experience	"always enforced facility rules and policies." and "Responded quickly to emergencies.. ." use a different Calibri font variant than the rest of the bullet text in that section (per embedded font names)	Checklist #18	Unclear	Both render visually as regular Calibri, but are embedded under a distinct font instance in the file. This may be an artifact of copy-pasting from a different source and might not be visually noticeable — worth a quick side-by-side check in the actual document.	Reformat/replace these lines directly in the resume to ensure a single consistent font instance	Yes
---	------------	--	---------------	---------	---	---	-----

All content (wording, dates, tense, punctuation, bullet presence) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — the wording, dates, and bullets are all still correct here. This version introduces a **mix of fonts, sizes, and styles** that don't match each other:

Where	What's different	Fix
Education	Your degree line is now bold, but the university line below it isn't	Remove the bold

Technical Skills	Your "Testing" skills list is now in italics, but "Software" isn't	Remove the italics
Academic Projects	Both project titles are now bold mid-sentence	Make consistent — either match how job titles are styled, or remove
Experience (Exercise Physiology Intern)	5 of 6 bullets are now italicized, but the first bullet isn't, and no other job's bullets are italic	Remove the italics from these bullets
Experience (Lifeguard)	The last bullet is a slightly bigger font than everything else on the page	Match it to the rest (11pt)

The Career Center guideline is clear on this: "The text needs to be consistently formatted. Layout, font, style, punctuation, and organization should be the same throughout the document" (Tip 7). Right now, several sections each have their own one-off styling that doesn't match the rest of the page — worth a full pass through the document to make sure every section uses the same font, size, and style choices.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Multiple isolated font/style inconsistencies introduced across the document — verified directly against the PDF's embedded font and size data (not just visual impression):

1. Education degree line bolded (rest of Education section is not)
2. Technical Skills "Testing" list italicized (rest of section is not)
3. Both Academic Projects titles bolded mid-sentence
4. 5 of 6 Exercise Physiology Intern bullets italicized (1st bullet and all other jobs' bullets are not)
5. Final Lifeguard bullet is 12pt vs. 11/11.5pt used everywhere else

6. Two Lifeguard-section text runs use a distinct embedded font instance from the rest of the document (visually similar, but technically inconsistent — may indicate copy-paste from elsewhere)

This is directly the kind of inconsistency Tip 7 (p.2) explicitly warns against: "Layout, font, style, punctuation, and organization should be the same throughout the document."

AI confidence level: High — all findings verified directly from the PDF's embedded font/size metadata, not inferred from appearance alone.

Items requiring human verification:

- Visual confirmation in the actual document of items 1, 2, 4, 5 (should be easily visible)
- Item 6 may not be visually apparent — worth checking if it's a meaningful issue or just a file-generation artifact

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — this is the most rigorously verified finding in the whole series, based on direct extraction of font name and size for every character run in the document.

Suggested discussion points:

- Good opportunity to walk through Tip 7 explicitly and have the student do a full-document formatting pass (select all text, reset to one font/size, then reapply bold only to name/headers/job titles) rather than trying to fix each instance individually.
- Given how many isolated formatting elements have shifted across this entire draft series, recommend the advisor confirm the student is working from one single master document rather than repeatedly copy-pasting between sources, which could explain the recurring inconsistencies.

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Visual confirmation of the bold/italic/font-size inconsistencies listed above

Resume #14:

Confirmed: this version now spans **two pages**. Nearly all the content spills onto page 1, and page 2 contains just a single orphaned bullet: "Responded quickly to emergencies and maintained a calm, professional presence under pressure."

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Overall Length	Document now spans 2 pages; page 2 contains only one orphaned bullet	Checklist #15, #24	Needs Revision	The guideline states undergrads/new grads "rarely need more than one page" (Tip 4), and the whole "Having Trouble Fitting Everything onto One Page" section (p.2) exists specifically to help avoid this. Right now the resume overflows by one line, leaving nearly an entire blank second page for a single bullet — a very inefficient use of space.	Tighten spacing/margins slightly, or shorten a line elsewhere, to pull that last bullet back onto page 1	Yes (confirm final print/PDF layout)

2	Formattin g	Last two Lifeguard bullets are now run together with no space or line break: "...facility rules and policies. • Responded quickly..."	Checklist #21, #24	Needs Revision	The line break between these two bullets appears to have been lost — they're now mashed together with the bullet marker directly touching the end of the previous sentence, which likely contributed to the page overflow and is also a visible formatting error on its own.	Restore the line break so each bullet starts on its own line	Yes
---	----------------	---	--------------------	----------------	--	--	-----

All other content (wording, dates, tense, punctuation) is otherwise unchanged and correct from the last content-verified version.

C. Student-Facing Report (delta from last version)

Hi Josh — the wording here is all still correct, but this version has two formatting problems that are connected:

1. Two bullets got merged together with no line break.

In your Lifeguard section: "...enforced facility rules and policies. • Responded quickly to emergencies..." — these should be two separate bulleted lines, but the line break between them is missing.

2. This pushed your resume to two pages.

Because of that merge (and possibly some other small spacing), your very last bullet — "Responded quickly to emergencies and maintained a calm, professional presence under pressure." — got bumped onto a second page all by itself. The Career Center guideline is clear

that student resumes should almost always fit on **one page** (Tip 4), and having a second page with just one line looks unfinished to an employer.

Fix: Restore the line break between those two bullets first — that alone may pull everything back onto page one. If it's still slightly over, the guideline's own space-saving tips (p.2) suggest: 0.5" margins, single spacing, or trimming a line of description somewhere.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Document now spans 2 pages (confirmed via direct page count on the PDF) — page 2 contains only the final Lifeguard bullet. Root cause appears to be a missing line break between the last two Lifeguard bullets, which merged into one run-on line and pushed content over the page boundary. Direct conflict with Tip 4 (one-page norm) and the entire "Having Trouble Fitting Everything onto One Page" guidance section (p.2).

AI confidence level: High — page count and the missing line break were both verified directly from the PDF, not inferred.

Items requiring human verification:

- Confirm the actual printed/exported layout matches this — page breaks can sometimes shift slightly between viewers, so worth a final visual check once the line break is restored

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — page count and the bullet-merge are both directly confirmed from the file structure.

Suggested discussion points:

- Straightforward fix — restoring the missing line break should very likely bring this back to one page given how close it already was.

- Good opportunity to walk through the guideline's page-1 "fitting everything on one page" tips (margins, font, spacing) in case any further trimming is needed after the line break fix.
-

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
4. Confirm final one-page layout once the missing line break is restored

Resume #15:

Comparing this to the last content-verified version — the missing line break/page overflow issue from last time is gone (back to one page, one bullet per line). But **first-person pronouns ("I") have been added** to five bullets across three sections.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Academic Projects	"I conducted an in-depth literature review on the connection between gluten sensitivity..."	Checklist #19	Needs Revision	Guideline explicitly says to avoid first-person pronouns ("I," "we," "my") — Tip 8, p.2.	"Conducted an in-depth literature review on..."	No
2	Academic Projects	"I partnered with a team of four to develop individualized , sport-specific training programs..."	Checklist #19	Needs Revision	Same issue.	"Partnered with a team of four to develop..."	No
3	Experience	"I advised customers using in-depth nutrition and product knowledge..."	Checklist #19	Needs Revision	Same issue.	"Advised customers using in-depth nutrition and product knowledge..."	No
4	Experience	"I matched product recommendations to	Checklist #19	Needs Revision	Same issue.	"Matched product recommendations to	No

		individual needs..."				individual needs..."	
5	Experience	"I researched the benefits of products to support customer education..."	Checklist #19	Needs Revision	Same issue.	"Researched the benefits of products to support customer education..."	No
6	Experience	"I ensured safety of children through monitoring of pool..."	Checklist #19	Needs Revision	Same issue.	"Ensured safety of children through monitoring of pool..."	No
7	Experience	"I responded quickly to emergencies and maintained a calm, professional presence..."	Checklist #19	Needs Revision	Same issue.	"Responded quickly to emergencies and maintained a calm, professional presence..."	No
8	Overall Length	Content fits back on one page	Checklist #15	Pass	Resolves the two-page issue from the previous draft.	None	No
9	Experience (Cardiac/Pulmonary Rehab)	"Lead 12 one-hour cardiac...", "Administer and review...", "Check patient EKGs...", "Write exercise prescriptions. .", "Teach patients..."	Checklist #19	Pass	Notably, none of the Cardiac/Pulmonary Rehab bullets have "I" added — only Academic Projects, Sales Associate, and Lifeguard bullets do. Worth confirming this	None needed	No

"Monitor
patient
adherence..."

is exactly what
shows in the
actual
document.

All other content (dates, tense, punctuation, bullets) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — good news: the page-overflow issue from last time is fixed, you're back to one page.

This version has a new issue, though: **"I" has been added to the start of 7 bullets**, across Academic Projects, Sales Associate, and Lifeguard. The Career Center guideline specifically says to avoid first-person pronouns like "I," "we," and "my" (Tip 8) — resume bullets should jump straight into the action verb.

Now reads	Fix
"I conducted an in-depth literature review..."	"Conducted an in-depth literature review..."
"I partnered with a team of four..."	"Partnered with a team of four..."
"I advised customers..."	"Advised customers..."
"I matched product recommendations..."	"Matched product recommendations..."
"I researched the benefits of products..."	"Researched the benefits of products..."
"I ensured safety of children..."	"Ensured safety of children..."
"I responded quickly to emergencies..."	"Responded quickly to emergencies..."

Simple fix: just delete "I" from the start of each — the verb (Conducted, Advised, Ensured, etc.) already works fine on its own as the sentence's start.

Nice catch, by the way: your Cardiac and Pulmonary Rehab bullets don't have this issue — they're clean. Just these other three sections need the "I" removed.

Still outstanding from before

LinkedIn URL format, SPSS version, and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

First-person pronoun "I" added to the start of 7 bullets across Academic Projects (2), Sales Associate (3), and Lifeguard (2) — direct conflict with Tip 8 (p.2): "avoid using first person pronouns such as 'I,' 'we,' and 'my.'" Notably, the Cardiac/Pulmonary Rehab bullets in Experience were not affected.

Resolved: Page-overflow/missing line break issue from the previous draft is fully fixed — content is back to one page.

AI confidence level: High — this is an explicit, unambiguous guideline rule and the pronoun instances are directly visible in the text.

Items requiring human verification: None new.

Carried over from before:

- LinkedIn URL format
- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — flagged text is directly quoted from the submitted document.

Suggested discussion points:

- Straightforward fix — this is one of the clearest, most explicit rules in the guideline packet, so a quick explanation of "why" (résumés are marketing documents where the subject is implied — Tip 1) may help this stick for future drafts.
- Worth noting the uneven pattern (only 3 of the 4 experience/project sections affected) — may indicate the student edited some sections but not others; a full read-through before final submission would catch this.

E. Items Requiring Human Verification

1. Correct, working LinkedIn URL
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List

Resume #16:

Comparing this to the last version — all 7 pronoun issues are fixed. But the **entire contact info line is now missing**.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Academic Project, Sales Association, Lifeguard bullets	"I" removed from all 7 bullets flagged previously	Checklist #19	Pass	Resolves the pronoun issue from the last draft.	None	No

2	Contact Info	Header now reads only "Josh DeGregorio" — no city/state, phone, email, or LinkedIn URL anywhere on the resume	Checklist #1	Needs Revision	This is a significant issue. The guideline requires contact info to include "name, city, state, phone number, email address, and customized LinkedIn URL" (p.1). Without any of this, an employer has literally no way to contact the student — this goes beyond a style preference into a functional resume failure.	Restore the full contact line: "Lowell, MA 555-555-5555 josh_Degregorio@student.uml.edu www.linkedin.com/joshdegregorio "	Yes
---	--------------	---	--------------	----------------	---	--	-----

All other content (dates, tense, punctuation, bullets, formatting) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — the "I" pronoun issue from last time is fully fixed across all 7 bullets. Nice work.

But this version has a much bigger problem: **your entire contact information line is missing.** Right now the resume only shows your name — no phone number, no email, no location, no LinkedIn link. This is the most important fix in this whole review, because without contact info, an employer literally has no way to reach you no matter how strong the rest of the resume is.

Fix: Add this line back under your name:

"Lowell, MA | 555-555-5555 | josh_Degregorio@student.uml.edu | www.linkedin.com/joshdegregorio"

Please double check this is in the actual file before this goes anywhere near an employer — this one really can't wait for the advisor meeting to catch.

Still outstanding from before

SPSS version and honors/awards — still open for your advisor. (LinkedIn URL format question is now moot until contact info is restored — please re-confirm the URL is correct once it's back in.)

D. Staff-Facing Report (delta from last version)

Summary of new issues:

All contact information (city/state, phone, email, LinkedIn URL) has been removed from the header — only the name remains. This is a critical functional failure, not just a style issue: the guideline explicitly requires this information (p.1, "Contact Information"), and without it the resume cannot serve its basic purpose of enabling an employer to make contact.

Resolved: All first-person pronoun instances from the previous draft are corrected.

AI confidence level: High — contact info presence/absence is directly and unambiguously observable.

Items requiring human verification:

- Confirm this is not a file-export error (e.g., a header/footer that didn't render in this particular PDF export) versus an actual edit to the source document

Carried over from before:

- SPSS version

- Honors/awards status
- (LinkedIn URL correctness — now blocked pending restoration of contact info entirely)

Possible hallucination or overreach risk: None — this is a direct comparison of what's present versus a clear, explicit guideline requirement.

Suggested discussion points:

- Flag this as the top-priority item for the appointment — a resume without any contact information cannot be used, regardless of how polished the rest of it is.
 - Worth quickly checking whether this is a genuine content deletion or a technical/export issue, since it's such an unusual and high-stakes omission compared to the more typical wording/formatting issues seen in prior drafts.
-

E. Items Requiring Human Verification

1. **Priority:** Confirm and restore complete contact information (city/state, phone, email, LinkedIn) — verify this wasn't a file export glitch
2. Correct, working LinkedIn URL (once restored)
3. Actual SPSS version used
4. Existence of any honors, awards, or Dean's List

Resume #17:

Comparing this to the last version — contact info is fully restored (great). One small quantification regression: the specific patient count in one bullet was replaced with a vague phrase.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Contact Info	"Lowell, MA 555-555-5555 josh_Degregorio@student.uml.edu www.linkedin.com/joshdegregorio "	Checklist #1	Pass	Fully restored — resolves the missing contact info issue from the last draft.	None	No

2	Experience	"Lead 12 one-hour cardiac and pulmonary exercise classes weekly, each with some patients. "	Checklist #9	Needs Revision	This previously read "each with 3-8 patients" — a specific, quantified detail. "Some patients" is vague and removes exactly the kind of number the guideline asks for: "Whenever possible, quantify experience" (p.1, Experience). This is a step backward from the earlier, stronger version of this bullet.	Restore the specific range, e.g., "each with 3-8 patients"	Yes (confirm actual patient count)
---	------------	--	--------------	----------------	---	--	------------------------------------

All other content (dates, tense, punctuation, bullets, contact info) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — great, your **contact information is fully back** — phone, email, location, and LinkedIn are all there again. That critical issue is resolved.

One small thing slipped in this version: your first Cardiac/Pulmonary Rehab bullet now says "each with **some patients**" instead of the specific number you had before ("each with **3-8 patients**"). The Career Center guideline specifically calls out quantifying your experience whenever possible — a concrete range like "3-8 patients" is much stronger and more credible than a vague word like "some."

Fix: "Lead 12 one-hour cardiac and pulmonary exercise classes weekly, each with 3-8 patients." (or whatever the accurate current number is)

Still outstanding from before

SPSS version and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

One bullet's quantified detail ("3-8 patients") was replaced with a vague phrase ("some patients") — a minor regression against the "quantify whenever possible" guidance (p.1, Experience section).

Resolved: Contact information fully restored — the critical issue from the previous draft is resolved.

AI confidence level: High — this is a direct, verifiable wording comparison against the student's own previously-submitted (and stronger) version of the same bullet.

Items requiring human verification:

- Confirm the accurate patient count/range if it's changed, or if this was simply an unintentional edit

Carried over from before:

- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — flagged based on direct comparison with the student's own prior wording.

Suggested discussion points:

- Quick, easy fix — likely just needs the specific number restored.
 - Good moment to reinforce why specific numbers matter more than general words like "some" or "many" — concrete details are more credible and memorable to a reader.
-

E. Items Requiring Human Verification

1. Confirm the accurate patient count for this bullet (previously "3-8")
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List

Resume #18:

Comparing this to the last version — the patient count is restored (good). But this version drops the full name of "General Nutrition Centers (GNC)" down to just "GNC" — meaning the acronym is now used without ever being spelled out.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Experience	"Lead 12 one-hour cardiac and pulmonary exercise classes weekly, each with 3-8 patients."	Checklist #9	Pass	Specific patient count restored — resolves the vague "some patients" issue from the last draft.	None	No
2	Experience	"Sales Associate... GNC , Tyngsboro, MA"	Checklist #17	Needs Revision	This organization was previously written out in full the first time it appears ("General Nutrition Centers (GNC)"), which is exactly what the guideline asks for: spell out an acronym before using it (Tip 6, p.2). Now it appears only as "GNC" with no expansion anywhere on the resume.	Change back to "General Nutrition Centers (GNC), Tyngsboro, MA"	No

A note on two related items that I'm flagging now for the first time, since this draft's theme prompted a closer look: "EKG" (in the Cardiac/Pulmonary Rehab bullet: "Check patient EKGs for ischemic changes...") and "YMCA" (in the Lifeguard section) have actually appeared unexpanded in *every* version reviewed so far, including the ones marked fully compliant. I hadn't flagged them previously — worth correcting that oversight now:

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
3	Experience	"Check patient EKGs for ischemic changes and monitor vital signs during classes."	Checklist #17	Needs Revision	"EKG" (electrocardiogram) is never spelled out anywhere on the resume. This has been present in every draft, not just this one.	"Check patient electrocardiograms (EKGs) for ischemic changes..." on first use	No

4	Experience	"YMCA, Lowell, MA" (Lifeguard section)	Checklist #17	Unclear	"YMCA" is a very widely recognized organization name, so this is a borderline case — the guideline's intent (avoid acronyms the reader might not understand) may reasonably not apply here, similar to how "UMass Lowell" is used without expansion elsewhere in the guideline's own sample resume. Flagging as Unclear rather than Needs Revision since this is a judgment call.	Optional: spell out as "Young Men's Christian Association (YMCA)" if strict compliance is wanted; likely fine as-is given how universally recognized this acronym is	Yes — advisor judgment call
---	------------	--	---------------	---------	---	--	-----------------------------

All other content (dates, tense, punctuation, bullets, contact info) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — your patient count ("3-8 patients") is back. That's resolved.

This version has a new small issue: **your Sales Associate employer is now just "GNC"** instead of "General Nutrition Centers (GNC)." The guideline asks you to spell out an acronym the first time you use it, then you can use the short form after that — but right now "GNC" appears with no expansion anywhere.

Fix: "General Nutrition Centers (GNC), Tyngsboro, MA"

Also worth a look (not new to this draft, but caught it while reviewing acronyms): "EKG" in your Cardiac/Pulmonary Rehab bullet is never spelled out either. Consider: "electrocardiogram (EKG)" on first use. ("YMCA" is probably fine as-is since it's such a widely recognized name — that one's more of a judgment call for your advisor.)

Still outstanding from before

SPSS version and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

"General Nutrition Centers (GNC)" shortened to just "GNC" with no expansion — conflicts with Tip 6 (p.2): spell out acronyms before first use.

Also flagging (missed in prior reviews, not new to this draft): "EKG" has never been spelled out across any submitted version — this is a standing gap that should have been caught earlier. "YMCA" is also unexpanded but is arguably exempt given how universally recognized it is (similar to how the guideline's own sample resume uses "UMass Lowell" freely).

Resolved: Patient count quantification restored from the previous draft.

AI confidence level: High for the GNC and EKG findings (direct textual comparison/guideline match); Medium/judgment-call for whether YMCA needs expansion.

Items requiring human verification:

- Advisor judgment on whether YMCA needs spelling out, or is reasonably treated as common knowledge

Carried over from before:

- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None for GNC/EKG (direct textual observations). Flagging the YMCA case explicitly as a judgment call rather than a clear violation, to avoid overreach on a well-known acronym.

Suggested discussion points:

- Good moment to do one clean pass on all acronyms in the document at once (GNC, EKG, YMCA, CPR/AED — the last one is already done correctly) rather than catching them one at a time.

- Worth noting to the student: CPR/AED is a good model of how to do this right, since it's already properly formatted with the acronym in parentheses after the full term.
-

E. Items Requiring Human Verification

1. Advisor judgment: whether "YMCA" needs to be spelled out or is acceptable as-is
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List

Resume #19:

Comparing this to the last version — GNC is spelled out again (good). But the **university name/location line in Education is now scrambled** into a reversed, backwards order.

B. Resume Audit Table (updated items)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify ?
1	Experience	"General Nutrition Centers (GNC), Tyngsboro, MA"	Checklist #17	Pass	Spelled out again — resolves the acronym issue from the last draft.	None	No
2	Education	" MA, Lowell, University of Massachusetts Lowell "	Checklist #4	Needs Revision	This line has been reordered into "state, city, university name" — backwards from every other location reference on the resume (which all use "Organization, City, State" — e.g., "Lowell General Hospital, Lowell, MA" in Experience). It also doesn't match the guideline's own model, which lists the university name first, then city/state ("University of Massachusetts Lowell – Lowell, MA," p.3 sample).	"University of Massachusetts Lowell, Lowell, MA"	No

This reads as
scrambled/backwa
rds rather than a
stylistic choice.

All other content (dates, tense, punctuation, bullets, contact info, acronyms) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — "General Nutrition Centers (GNC)" is spelled out correctly again. That's resolved.

This version has a new issue in your **Education** section — the university line is now reversed and reads oddly:

"MA, Lowell, University of Massachusetts Lowell"

Every other organization on your resume follows "Name, City, State" order (like "Lowell General Hospital, Lowell, MA" in your Experience section), and the Career Center's own sample resume follows that same pattern for Education. This line is backwards from that.

Fix: "University of Massachusetts Lowell, Lowell, MA"

Still outstanding from before

SPSS version and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Education's university/location line is reordered to "State, City, University Name," inconsistent with the "Organization, City, State" format used everywhere else on the resume (Experience section) and inconsistent with the guideline's own sample Education format (p.3: "University of Massachusetts Lowell – Lowell, MA").

Resolved: GNC acronym issue from the previous draft is corrected.

AI confidence level: High — this is a direct, observable format inconsistency compared against both the rest of the document and the guideline's own model.

Items requiring human verification: None new.

Carried over from before:

- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: None — flagged based on direct comparison with the resume's own established format pattern and the guideline's sample.

Suggested discussion points:

- Quick, easy fix — likely just a reordering slip during editing.
 - Good final check: confirm every other organization/location line still follows "Name, City, State" for consistency, since this is the kind of small inconsistency that's easy to miss on a self-review.
-

E. Items Requiring Human Verification

1. Actual SPSS version used
2. Existence of any honors, awards, or Dean's List

Resume #20:

The text content matches the fully-compliant version exactly. The filename ("no_space") suggests a margin/spacing change, which won't show up in text extraction — let me check the actual file.

Analyzed spacing patterns and section formatting inconsistencies

Analyzed spacing patterns and section formatting inconsistencies

This is a whitespace/layout issue, not visible in the plain-text extraction — I checked the actual spacing measurements between lines, and found something specific.

B. Resume Audit Table (updated item)

#	Section	Resume Evidence	Guideline Ref	Status	Explanation	Suggested Fix	Staff Verify?
1	Overall Layout	Measured line spacing: the gap between the last line of one section and the next section header is only ~2.4–2.5pt (the same as normal single-line spacing) before TECHNICAL SKILLS, ACADEMIC PROJECTS, and EXPERIENCE — but there's a larger ~16.5pt gap before EDUCATION .	Checklist #16, #18, #24	Needs Revision	This is an inconsistency in section spacing: most section headers now run directly into the previous section's last line with no visual breathing room, while EDUCATION still has the extra space that visually separates it as a new section. The effect is that TECHNICAL SKILLS, ACADEMIC PROJECTS, and EXPERIENCE look like they're crammed right up against the content above them, making the document harder to scan at a glance — which works against Tip 5	Add consistent spacing before every header (matching whatever spacing precedes EDUCATION) so all five sections are visually separated the same way	Yes (confirm directly in the formatted document — this is best judged visually, since exact spacing can be hard to read from raw text)

(scannable in
under 20
seconds) and
Tip 7
(consistent
formatting
throughout).

All content (wording, dates, tense, punctuation, bullets, acronyms) is otherwise unchanged and correct.

C. Student-Facing Report (delta from last version)

Hi Josh — the wording here is all correct and unchanged. This version has a spacing issue that's subtle but affects how easy the resume is to scan.

Right now, the extra space that normally sits **above each section header** (like "EDUCATION," "EXPERIENCE," etc.) to visually separate it from the section before it is missing in three places: before **TECHNICAL SKILLS**, before **ACADEMIC PROJECTS**, and before **EXPERIENCE**. Only "EDUCATION" still has that breathing room above it — the other three headers now sit right up against the text above them.

This matters because a recruiter scanning your resume relies on that visual gap to quickly tell where one section ends and the next begins. Without it, sections can start to blur together.

Fix: Add the same spacing above TECHNICAL SKILLS, ACADEMIC PROJECTS, and EXPERIENCE that you already have above EDUCATION — in Word, this is often a "space before paragraph" setting that may have been accidentally cleared for just those three headers.

Still outstanding from before

Actual SPSS version and honors/awards — still open for your advisor.

D. Staff-Facing Report (delta from last version)

Summary of new issues:

Section spacing has become inconsistent — measured directly from the PDF's text positioning data, the vertical gap before 3 of 5 section headers (Technical Skills, Academic Projects, Experience) has collapsed to normal single-line spacing (~2.5pt), while the gap before

Education remains at the original wider spacing (~16.5pt). This creates an uneven visual hierarchy and conflicts with Tip 7's consistency requirement.

AI confidence level: Medium-High. The spacing measurements are precise and directly extracted from the PDF, so the underlying finding is solid; however, I'd recommend a quick visual confirmation since exact "how bad it looks" judgments are best made by eye, not just by the numbers.

Items requiring human verification:

- Visual confirmation of how this reads on the actual page — the numbers suggest a real inconsistency, but staff should eyeball it to judge severity

Carried over from before:

- SPSS version
- Honors/awards status

Possible hallucination or overreach risk: Low — this finding is grounded in precise positional data extracted directly from the PDF, though the interpretation of "how noticeable" this is involves some judgment.

Suggested discussion points:

- Straightforward fix — likely just needs "space before paragraph" reapplied consistently to all section headers in the source document.
 - This is a good one to double check by simply looking at the page, since spacing issues like this are often more visually obvious than they are in a data table.
-

E. Items Requiring Human Verification

1. Visual confirmation of the section-spacing inconsistency on the actual page
2. Actual SPSS version used
3. Existence of any honors, awards, or Dean's List
